A PAPER-MACHINE trunk is one of the
latest ideas. It is a trunk, and it is
practically indestructible.

Over eight hundred patents have

According to the most recent census

The catanachs of 6,000,000 contain
the remains of about 4,000 human be-
ings, and those of Paris about 3,000,
000. The latter were formerly stone
quarries. Many of the victims of the
revolution of 1793-94 are buried there.

The amount of coloring matter
stored in coal is such that one pound
of the mineral gives magnets sufficient
to color 500 yards of flannel, urine for
120 yards, vermilion for 2,500 yards,
and alizarine for 255 yards of turkey-
red cloth.

It is a season of dreadful tragedies.
There are disasters of various sorts—
buildings crumble, and death is in their
ruins; ships sink, and railroad trains
carry their passengers to destruction.
Of course, these are but coincidences,
yet sometimes these unfortunate occur-
rences come in groups as if there were
some unknown law which regulates them.

RACES such as the Teutonic charge
from 800 to 500 years ago, a first
passage to New York than other swift
ships of the same line, but a good deal
of the additional profit is absorbed by
coal alone. The so-called five-day
consumption per day of fuel for the
eighty tons of coal more than other
great steamships, and this item alone
means an extra cost of from \$180 to
\$240 per day.

What an immense sum Queen Vic-
toria might realize by the sale of her
watches. The oldest watches in the
world are in her possession. She has
two beautiful little gold ones by
Breguet that are supposed to be a hun-
dred years old. They have silver dials
and are of about the size of a two-shil-
ling piece. One is a kind of watch, the
other is a repeater. Both go per-
fectly and are in constant use. Her
majesty's favorite watch is a large
plain gold one by Lodge.

The apparent universal law that
things never happen singly but in
"waves" finds new support. A few
days ago this old car seemed to be
suffering from a very bad cold. The
sneezing and coughing almost seemed
to be in the newspapers. Now we
have a wave of railroad accidents,
nearly all preventable and due to gross
carelessness. What will be next? Per-
haps the millennium, when people stop
shooting each other and trains run
no more into collision, but it's doubtful.

A CURIOUS bit of local history is em-
bedded in the name of one of the
townships in New Castle county, Del.
The name as now spelled is "Pen-
cader," and it is that of the township
in which lies the "Welsh Knot" settled
about two hundred years ago by a
Welsh colony, some of whose de-
scendants still hold parts of the tract.
The name of the Welsh Knot stands
on hill, the only considerable em-
inence in Delaware, and Pencader is
only a slight corruption of the Welsh
Pen Cad, which means the great hill.
The name of the township is in South
America, Mexico and the West Indies. The com-
mon use of this field may be largely
possessed by the United States if we choose
to engage in active competition for it.
It lies at the very doors, inviting us
enterprise, and it will be our own fault
if we do not avail ourselves of the op-
portunity to appropriate it to ourselves.

The grip of an ant's jaw is retained
even after the body has been bitten off
and nothing but the head remains.
This knowledge is possessed by a cer-
tain ant in the National league for the week
end. The ant is a very peculiar one.
When an Indian gets a gash cut in his
hand, instead of having his hand sewn
together, as physicians do in this coun-
try, he procures a few of these ants, and
holding their heads near the gash, they bring their jaws
together in biting the flesh, and thus
pull the two sides of the gash together.
Then the Indian pinches off the bodies
leaving the heads clinging to the flesh.

the latter that Empress Josephine was

MISSOURI STATE NEWS.

For Tobacco Growers.

Hon. Levi Chubbuck, secretary of the
board of agriculture, has sent out the
following circular, dated Columbia,
Sept. 17:

DEAR Sir:—I am instructed by the chief
of the United States weather bureau to arrange
with the tobacco growers of the state relat-
ing to the establishment of a system of
warnings for their benefit.

The cold wave flag will be the most warn-
ing of the danger of frost. It will be hoisted
whenever a displayman (preferably a tobacco
grower) can be secured, who will put
candle, or secure by aid of the community,
a flag and display it from a tall mast for the
benefit of the growers of the section. The
bulletins published in public places, through
the press, by telephone, mill whistles, etc.,
will be sent by telegraph at government
expense, and the only cost to the grower
will be the purchase of the flag (it can be
made of any material, of the regulation
size and character, six (6) feet square,
and in the preferred colors of red and
white).

At points where daily forecasts are now
made, the displayman is requested to give
a second flag, from which to display the
forecast.
